“Supervise and Control facilities in full web with UTSY®”

With UTSY® enter the age of automation, which could forever shape the future in ways you manage your buildings and services.

UTSY® is interoperable with **SEJI**® and benefits from the same Web platform and security levels (https).

Thanks to our automated multi-protocols in addition to our full web monitoring, we give you the opportunity to stay connected to your real estate portfolio in any situation.

Remotely manage and control your buildings optimizing your operating time.

> “Digitalization settles in your buildings.”

UTSY® is a secure hypervision in Full Web, control the technical facilities 24 hours a day, 7 days a week, remotely modify the instructions, optimize energy, and make facilities more reliable.

With UTSY® monitor, manage and control heating, air conditioning, lift, high current, lighting, and energy. Manage temperatures for better anticipation..

> “Guarantee the best environment for your occupants.”
